It's beautiful, it's sweet, and the art is amazing, but don't be surprised if you feel depressed after playing. It's my first Zeiva game and. The story, music and art, everything isn't bad, feels a little too childish, not enough background perhaps ? But. If you're looking for an otome game where you can choose the person you want to be with, it's not for you. If you're looking for a game that end well, it's not for you.. The art and music are great. But in every single route the story feels rushed and incomplete.. When this game was announced I looked forward to it every day! and was excited as the days passed by till the release day before it was released on steam. As I fell in love with the story and it tore my heart to pieces with the events taking place in the story line. The only ending I will say that I prefer is with Tian Xi;; the others I cried for a few days. There is a bonus ending

which got my hopes up only to shatter it and I cried more. I love the soundtracks and the ending theme as well 'color my world', I played it roughly for six hours straight.. It's beautiful, it's sweet, and the art is amazing, but don't be suprised if you feel depressed after playing. I like how Dragon Essence combine everything I like in one game dragon, fantasy and historical setting. Like all Zeiva art this game have beautiful sprite, cg and background. I love it. All the years of waiting are worth it. But reading the ending makes me wish there are more so if there's a chance Zeiva will release bonus content for this game I will definitely go for it. Anyway I like how at the beginning we are able to see the world according to Chi An view. Reading the prologue make me think how fitting the tittle "Color My World" is. The writer also manage to describe the struggle woman of that time have to face and of course the struggle of being different. The endings are easy to archieve and the developer has kindly left us hint on how to get the other ending. Still even with that I find myself left with lots of archievement to unlock. Will try to get that when I went for the last 2 endings. Well if you are a fan of Zeiva game than you should know what to expect. However this game is completely different from the X series. It's much more lighter but stick to reality even if it set in a fantasy world with fantasy element. It's an enjoyable experience with a bit bitter taste. I recommend it for everyone to try it.. I like how Dragon Essence combine everything I like in one game dragon, fantasy and historical setting. Like all Zeiva art this game have beautiful sprite, cg and background. I love it. All the years of waiting are worth it. But reading the ending makes me wish there are more so if there's a chance Zeiva will release bonus content for this game I will definitely go for it. Will try to get that when I went for the last 2 endings. Well if you are a fan of Zeiva game than you should know what to expect. However this game is completely different from the X series. It's much more lighter but stick to reality even if it set in a fantasy world with fantasy element. It's an enjoyable experience with a bit bitter taste. I recommend it for everyone to try it.. Dragon Essence is another solid visual novel by Zeiva. The art and the music are beautiful. The characters are great, and the plot and writing are good. Though, each ending left me feeling a bit depressed. Overall, I'd give it a 7/10. There aren't really any truly happy endings.
